    |   └── main.jsx
    ├── .env
    └── package.json
```

02. backend setup

```
cd backend
npm init -y
npm install express mongoose cors dotenv
npm install nodemon --save-dev
```

03.package.json

```
"scripts": {
  "start": "node server.js",
  "dev": "nodemon server.js"
}
```

04.run backend

```
npm run dev
```

05.Frontend setup

```
cd ../frontend
npm create vite@latest .
npm install
npm install axios
```

06.Run frontend
npm run dev

07. **5. DEPLOYMENT**

- **Backend (Railway)**
  - Root: backend
  - Start: node server.js
  - Add env: MONGO_URI

- **Frontend (Netlify)**
  - Base: frontend
  - Build: npm run build
  - Publish: dist

08.From railway we have to generate domain and get url
09.Test the url
https://mern-item-manager-production-e2ff.up.railway.app/**api/items**
10.Add this to frontend environment variables
https://mern-item-manager-production-e2ff.up.railway.app/api

Git commonds
git init
git add .
git commit -m "first commit"
git remote add origin <repo link>
git branch -M main
git push -u origin main
